

Introducing SAAT: A Leap Forward in Legal Transcription

The graphic features a dark blue and purple background with a geometric pattern of overlapping lines. At the top center, the word "SCRIBE" is written in a bold, white, sans-serif font, with a white underline. Below the logo, on the left, is a smartphone frame containing a white, friendly-looking robot character with large, expressive eyes. To the right of the robot, the words "Scribe", "Advance", "Automated", and "Transcription" are stacked vertically in a white, sans-serif font. Each word has a blue underline on its first letter. At the bottom right of the graphic, the website address "scribe.com.my" is displayed in a blue, sans-serif font.

**By simply uploading videos, SAAT generates accurate transcripts within minutes, saving you time and resources.**

**SAAT has undergone extensive training and fine-tuning through hours of carefully selected recordings, producing accuracy of up to 90%.**

**Supports English and Bahasa Melayu.**

In the fast-paced world of legal proceedings, every minute counts. That's why we've developed **Scribe Advanced Automated Transcription (SAAT)**, a revolutionary tool designed to transform the way legal professionals manage transcription. Developed from thousands of hours of Malaysian legal video footage, **SAAT** offers unparalleled accuracy and speed in both English and Malay, all at half the cost of conventional transcription.

We have been rigorously using **SAAT** in real-time hearings, achieving draft notes accuracy up to **90%** for both arbitration and court proceedings. Our test case shows that counsel can conclude a morning's cross-examination and, **within minutes**, have the draft notes ready for review before the afternoon session. This swift turnaround is not just a convenience; it's a game-changer, allowing counsel to prepare and respond faster.

Moreover, **SAAT** transcriptions come with time stamps, offering an easy reference back to the recording's precise moments. This ensures that every argument and piece of evidence is accurately captured and easily accessible.

As part of our **early promotion**, we're excited to offer the first day's hearing for **SAAT** transcription **absolutely free!** This is our way of introducing you to the future of legal transcription, where efficiency, accuracy, and cost-effectiveness are paramount.

**SAAT** isn't just a transcription service; it's your next strategic advantage in the legal field. Welcome to a world where your litigation process moves as quickly as you do.
